Skills

React.js, Redux, Express, Python, JavaScript, Node.js, HTML5, CSS3, SQL, SQLite3, postgreSQL, AWS, Heroku, Git

Projects

Crafsty   [live site](#) | [github](#)
JavaScript, Python, HTML5, CSS3, React / Redux, Flask, AWS, SQLAlchemy, Postgres, Git

Project Description
- Collaborated with a team of four engineers to develop a comprehensive e-commerce platform, drawing inspiration from Etsy.
- Contributed expertise in JavaScript, Python, HTML5, CSS3, Redux, Flask, SQLAlchemy, Postgres, and Git to the project's success.
- Played a key role in delivering a fully functional live site and actively participated in managing the project's GitHub repository.

The Internets   [live site](#) | [github](#)
JavaScript, React / Redux, Express, Sequelize, PostgreSQL, CSS3, AWS, Git

Project Description
- Solo project: Developed a full-stack application inspired by Reddit, utilizing technologies such as JavaScript, React/Redux, Express, PostgreSQL, CSS3, and AWS.
- Implemented key features like user authentication, post creation, and comment functionality to create a dynamic and interactive platform.
- Demonstrated expertise in database management, server-side logic, and front-end design throughout the development process.

Experience

Enhancement Coach, Assist Programs | May 2023 - Present
- Successfully managed and executed after-school programming at multiple elementary school campuses within a specific region.
- Demonstrated advanced leadership by independently managing one to two campuses, overseeing solo shifts, and training new staff members in program facilitation.

Carpenter, California Drywall Co. | March 2020 - August 2022
- Contributed expertise to large-scale commercial projects, including the construction of Google offices and the Salesforce Tower, as a skilled union drywall and metal stud framer.
- Demonstrated proficiency in executing precise and efficient framing tasks, ensuring structural integrity and adherence to project specifications.
- Collaborated effectively with project teams, contractors, and other trades to meet tight deadlines and maintain the highest quality standards in the construction industry.

Education

App Academy | Winter 2024 | San Francisco, CA
Immersive software development course with focus on full stack web development
