Daniel Calderon

Elk Grove, CA, USA calderon07@proton.me 9168962438 in/calderon0 calderon1199.github.io

EXPERIENCE

Software Engineer

One Day Doors & Closets **August 2024 - June 2026, Roseville, CA**

- **Automated franchise onboarding for 87 US locations** by developing deployment tooling and workflows, including Google Cloud provisioning, vanity URL setup, and routing attribution configuration, reducing setup time by **30%** and standardizing multi-location launches.
- **Redesigned and implemented a Google Calendar API integration** supporting **10,000+ users**, enabling franchise owners to self-manage scheduling and calendar sharing within the CRM, eliminating all manual calendar configuration previously performed by the marketing team.
- **Migrated 100,000+ historical and future appointments** from a legacy system to a new platform using automated migration pipelines, achieving **zero data loss** while maintaining backward compatibility and uninterrupted customer operations.
- **Built a full-stack trade partner platform** integrating Postmark and ActiveCampaign APIs, automating application workflows and commission tracking for **200 trade partners generating $400,000+ in revenue**, enhancing partner engagement and operational visibility.
- **Designed and deployed a scalable, event-driven notification system** handling **~100,000 daily notifications** across email, SMS, mobile/desktop push, and in-app channels using PHP Artisan queues, webhooks, and Laravel, improving communication reliability and user engagement.
- **Delivered end-to-end CRM features**: Designed UI/UX in Figma, authored technical specifications in Notion, expanded MySQL schemas, built RESTful APIs with Laravel/Eloquent (PHP), and implemented React/TypeScript frontends used by **franchise operators across all locations**.

Site Coordinator

Assists Programs **December 2023 - July 2024, Elk Grove, CA, USA**

- Oversaw professional development for team members by delivering targeted coaching in curriculum execution and interactive teaching, strengthening overall program quality and staff confidence.
- Directed daily operations of school sites during staff absences, resolving incidents and swiftly addressing concerns to maintain consistent program delivery and a positive environment for students.

PROJECT

The Internets

Solo Engineer • theinternets.onrender.com/ • January 2024 - February 2024

- Built a full-stack social discussion platform inspired by Reddit using React, Redux, Express, PostgreSQL, and Sequelize, with support for community creation, post publishing, threaded commenting, and vote-based content engagement.
- Containerized the application with a multi-stage Docker build and environment-specific production configuration for PostgreSQL deployment, enabling a cleaner path to cloud hosting and release management.
- Developed 30+ RESTful API endpoints for users, sessions, communities, posts, comments, and likes/dislikes, including full CRUD operations, ownership-based authorization, and server-side validation with express-validator.
- Designed and integrated a relational PostgreSQL data model with 7 Sequelize models plus migrations and seed data for users, communities, posts, comments, media attachments, and voting relationships.
- Built a Redux-driven frontend architecture with async thunks, normalized state, React Router navigation, community search/discovery, profile dashboards, and post detail views with image carousel and engagement controls.

EDUCATION

Computer Science & Programming

App Academy | Non-Degree Program • San Francisco, CA • 2024

SKILLS

PHP, Laravel, React, TypeScript, JavaScript, MySQL, SQL, REST APIs, Material UI (MUI), styled-components, Git, database design, database migrations, reusable component development, state management, data tables, filtering and search, third-party API integrations, Google Calendar API, Figma

React, NextJS, Redux, Laravel, Flask

Node.js, Express.js, RESTful APIs

PostgreSQL, MySQL, Eloquent (ORM), Flask-SQLAlchemy

AWS, Cloudflare, Cloudways, Google Analytics, Google Tag Manager, Postman
